OBJECTIVES

As a motivated Information Science student with strong technical skills, I am eager to contribute as a software developer, enhancing my professional growth while supporting an organization's success. I am confident that my abilities will add value and help drive the organization's objectives forward.

PROJECTS

Nutrition Estimator

- Developed a Nutrition Calculator web application using MySQL, allowing users to calculate the nutritional values of selected food items by querying.
- Teck Stack - MySQL, Express.js, HTML, CSS, Node.js, JavaScript.

Multi-send Salary Disbursement

- Developed a blockchain-based salary disbursement system using Python and Flask, implementing secure multi-send transactions for employees' salaries.
- Teck Stack - Python, Flask, MongoDB, Web3.py, Hardhat, Waitress, HTML/CSS, smtplib.

Ecommerce website Testing

- Developed and tested an eCommerce web application with user authentication, product management, and automated Selenium tests.
- Teck Stack - Selenium WebDriver, Python unittest, Pandas.
